Summary

Software developer specializing in business applications, API integrations, and data workflows. Combines hands-on software development with experience managing commercial operations, translating client requirements into working systems. Delivered paid projects involving payment processing, fulfillment automation, serverless integrations, and a Python/PostgreSQL pipeline processing over 7,500 business records.

Technical Skills

Languages: TypeScript, Python, SQL, Kotlin, Swift, Rust

Backend & Data: PostgreSQL, REST APIs, Netlify Functions, Firebase, Stripe API

Frameworks & Tools: React, React Router, Vite, Jetpack Compose, Git, GitHub, Resend API, OpenAI API, Bash, zsh

Software Projects

Paola Book Sales - Storefront and Fulfillment Dashboard | Paid client project | 2026
- Built a bilingual storefront and authenticated fulfillment dashboard; handled about $600 in launch-day sales.
- Stored fulfillment state in Stripe metadata, keeping Stripe as the system of record without a separate database.

Steelwise Consulting - Lead Data Pipeline and Delivery Site | Paid client project | 2026
- Enriched 7,500+ steel-industry leads with addresses and product data using Python, PostgreSQL, and an LLM API.
- Built key-based delivery: sellers confirm regional availability, then a key unlocks those exact records for the client.

IAV Circle - Podcast and Coaching Website | Paid client project | 2026
- Built the site from AI-generated HTML briefs, verifying each claimed link, form, and domain before building on it.
- Delivered email-verified signups with no CRM, database, or paid tools, using Netlify Functions and Resend.
- Traced an email failure that returned HTTP 200 to the wrong Resend API key by querying the vendor API directly.

PvPlayer - Music Video Playback Companion | Personal project, in progress | 2026
- Developed a Rust playback controller that synchronizes mpv video with MPD audio, using track metadata, preloading, and event-driven state transitions to manage playback timing.

Experience

Mobile Software Developer
Oceanum Group | Nov 2026 - Present
- Resuming development of Nearvye, a Swift iOS Bluetooth Low Energy matching app whose MVP I previously built.
- Uses Firebase Authentication, Realtime Database, and Storage, storing only authentication and profile-image data.

AV Lead
Encore Global | Dallas, TX | Mar 2023 - Present
- Set up, operate, and troubleshoot live-event AV systems; guide other technicians during setup and operation.

Owner / Photographer & Videographer
Elm Aperture | Dallas, TX | Nov 2019 - Present
- Photographed about 50 hotels in Texas and nearby states, coordinating properties, owners, routes, and delivery.
- Manage estimates, scheduling, contracts, invoicing, payment collection, and delivery.
- Freelanced studio coordination and photography for Ambishen Studio, Dallas, 2019 - 2022.

Managing Member
Save State Records LLC | Dallas, TX | Jul 2020 - Present
- Handle state filings, tax correspondence, contracts, finances, and digital distribution.

Education

Full-Stack Web Development Bootcamp (Certificate)
University of Texas at Dallas, powered by Fullstack Academy | Aug 2023 - Feb 2024
